Your data is safe with
ineo SECURE

Smart security to keep your business safe

In recent years, data breaches have become a serious issue for many businesses, with widespread media coverage of data theft and hacking causing damage to various companies' finances and reputations globally. At DEVELOP, we know that protecting your data is key to your business. That is why our ineo multifunctional devices embed the highest level of security, and with ineo SECURE, we can provide you with an extra layer of comprehensive protection, ensuring that your data stays yours, without interrupting the flow of data in your office.

The ineo SECURE service can be activated on any DEVELOP ineo multifunctional device, either on-premises or prior to delivery, so no matter the size of your business, you can operate with confidence. Once ineo SECURE safeguards are in place, you can be sure your print data will enjoy uncompromising security protection. Your ineo multifunctional device and its hard drive (HDD) will be protected to ensure your data is more than just secure – they'll be ineo SECURE!

DATA – Your most valuable and vulnerable business assets

Of all your business assets it is quite possible that your data is the most valuable – and most vulnerable. But securely safeguarding those assets could not be simpler: ineo SECURE protects your documents, data and corporate information.

KEY CONSIDERATIONS FOR YOUR PRINTING SECURITY

> **Data protection:** Your device can be protected via several encryption and overwriting methods, keeping the data in your ineo safe. This protects data stored in your ineo and data passing through temporarily. With ineo SECURE, the data in your office can flow safely, with no risk of security breach.

> **Authentication:** Protect sensitive documents by storing them in a password-protected box or folder on your ineo's hard disk. For an extra level of security, the hard disk can be encrypted, so even if it is stolen and access is attempted by installing the hard disk elsewhere, the data will be secure.

> **Automated rules enforcement:** When you print a document, the data is temporarily stored in the multifunctional device. With ineo SECURE you can set a time limit for how long your device stores this temporary data, to make sure data is not left where it may tempt attack. You can even select different time limits for certain box files on your ineo's hard disk.

What is covered?

The following features are included in ineo SECURE

- > Change the Administrator password
- > Encrypt the entire contents of your ineo hard disk
- > Create a secure alphanumeric password to lock down your ineo hard disk
- > Eliminate any trace of data even after it has been deleted with Temporary Data Overwrite
- > Time your ineo multifunctional device to autodelete any material located in electronic folders

Wouldn't it be great to enjoy optimal **ease of use**?

We offer you solutions that adapt to your daily working habits and save a lot of time in routine office tasks like printing, scanning or copying. You can customise the individual screen features, specific functions and workflows to be activated via your ineo device's display. Frequently used functions can be placed on your start screen while functions you don't use can simply be removed.

Ever dreamed of using a personally **customised device**?

You can now make your ineo device a true part of your business. Start with your own company logo, display a Flash video when the display is idle, customise your user interface on the screen, and have your business-relevant apps accessed straight from the operating panel.

Useful apps, remote app updates, connectors to cloud solutions such as Google Drive or Google Mail, paper templates – just about everything you need to improve your business processes is available from DEVELOP's dstore.

Want to enjoy more **mobility** at work?

More and more businesses are transforming their offices into mobile workplaces. Employees enjoy the flexibility of working where they want, yet still need to stay connected. DEVELOP makes printing from a mobile device even easier and more intuitive than from a PC. You don't even need to download external apps or install a specific printer driver – our mobile features integrate seamlessly with innovative mobile technologies to let you print from your tablet or smartphone with just one click. Our security functionality ensures your data are safe, and on most ineo devices, access to safety features like secure print, user authentication and account tracking comes with the free app ineoPRINT.

ineoPRINT

The free ineoPRINT app connects iOS or Android devices to ineo systems, for intuitive printing and scanning.

With ineoPRINT, documents can be printed from, or scanned to the main cloud storage platforms, bringing the documents to your hand anytime you need them.

Download the free ineoPRINT app directly from the AppStore or Google Play Store.
