# Discover what advanced security could do for your business

When you work with sensitive information, you need to know it is secure. Even when doing simple tasks such as printing or scanning documents, you could be leaving data open to theft. If you need to guarantee the safety of your data, you need a service that is comprehensive, offering protection and advanced security for both your network and your multifunctional office device. At Develop, our ineo multifunctional devices come with industry-leading security built in. What's more with ineo SECURE Platinum, we can tailor security features to your office needs. Whether you already have a Develop ineo device or are considering purchasing one, we can activate ineo SECURE Platinum features on-premises or prior to delivery, so you can work safe in the knowledge that your data is in good hands.

The ineo SECURE Platinum service can be activated on any Develop ineo multifunctional device, so no matter the size of your business you can operate safely and with the confidence that your data is secure. Once ineo SECURE Platinum safeguards are in place, you can be sure your data will enjoy uncompromising security protection. Your ineo multifunctional device in your network will be protected to ensure your data is more than just secure – they'll be ineo SECURE!

# DATA – Your most valuable and vulnerable business assets

**Of all your business assets it is quite possible that your data is the most valuable – and most vulnerable. But securely safeguarding those assets could not be simpler: ineo SECURE protects your documents, data and corporate information.**

## KEY CONSIDERATIONS FOR YOUR INEO NETWORK SECURITY

> **Data protection:** With ineo SECURE Platinum, you receive a new, unique and secure password to protect your ineo from attacks. Furthermore, your device can be protected via several encryption and overwriting methods, keeping the data passing through your ineo safe. The encryption will also prevent data being read in the event of a security breach and protected by an extra password should anyone attempt to install the hard disk elsewhere.

> **Advanced network security**: When you send information over your network, you need to know that it is only going to the destination you intend, and not being read by anyone else. By activating HTTPS network encryption with ineo SECURE Platinum, you can guarantee your data is being communicated safely across your network.

> **Access control:** In some office environments, your multifunctional device may be used by many people with varying levels of security clearance. ineo SECURE Platinum allows you to activate user authentication and assign different levels of access to different users. You can also activate automatic log off for accounts, keeping your device safe from outside security risks.

> **Keep track:** When you need to keep data secure, it is important to know that you can provide documentary evidence of what information is passing through your system. ineo SECURE Platinum enables audit logs for your ineo device, collecting a chronological account of activities in an audit trail.

# What is covered?
# The following features
# are included in
# ineo SECURE Platinum

> Change the Administrator password

> Encrypt the entire contents of your ineo hard disk

> Create a secure alphanumeric password to lock down your ineo hard disk

## Wouldn't it be great to enjoy optimal ease of use?

We offer you solutions that adapt to your daily working habits and save a lot of time in routine office tasks like printing, scanning or copying. You can customise the individual screen features, specific functions and work-flows to be activated via your ineo device's display. Frequently used functions can be placed on your start screen while functions you don't use can simply be removed.

## Ever dreamed of using a personally customised device?

You can now make your ineo device a true part of your business. Start with your own company logo, display a Flash video when the display is idle, customise your user interface on the screen, and have your business-relevant apps accessed straight from the operating panel.

Useful apps, remote app updates, connectors to cloud solutions such as Google Drive or Google Mail, paper templates – just about everything you need to improve your business processes is available from Develop's dstore.

## Want to enjoy more mobility at work?

More and more businesses are transforming their offices into mobile workplaces. Employees enjoy the flexibility of working where they want, yet still need to stay connected. Develop makes printing from a mobile device even easier and more intuitive than from a PC. You don't even need to download external apps or install a specific printer driver – our mobile features integrate seamlessly with innovative mobile technologies to let you print from your tablet or smartphone with just one click. Our security functionality ensures your data are safe, and on most ineo devices, access to safety features like secure print, user authentication and account tracking comes with the free app ineoPRINT.

### ineoPRINT

The free ineoPRINT app connects iOS or Android devices to ineo systems, for intuitive printing and scanning.

With ineoPRINT, documents can be printed from, or scanned to the main cloud storage platforms, bringing the documents to your hand anytime you need them.

**Download the free ineoPRINT app directly from the AppStore or Google Play Store.**
